Signal Processing 45 (1995) 407–408

SIGNAL PROCESSING

Cumulative contents of Volume 45

Volume 45, No. 1, July 1995

Papers

G. Burel and H. Hénocq
Three-dimensional invariants and their application to object recognition 1
S.J. Golin
A simple variable-length code 23
F.M. Aparicio Acosta
Radial basis functions and related models: An overview 37
N. Delfosse and P. Loubaton
Adaptive blind separation of independent sources: A deflation approach 59
K. Yoo and H. Park
Fast residual computation for sliding window recursive least squares methods 85
W.A. Frank
An efficient approximation to the quadratic Volterra filter and its application in real-time loudspeker linearization 97
R.J. Kosick and S.A. Kassam
A unified approach to coherent source decorrelation by autocorrelation matrix smoothing 115
G. Giunta
Accuracy of a time delay estimator with unknown sampled signals 131

Announcements and calls for papers 137

Volume 45, No. 2, August 1995

Papers

C. Chang and S. Chatterjee
Some deterministic approximations for stochastic stereo matching 143
M. Vemis, G. Economou, S. Fotopoulos and A. Khodyrev
The use of Boolean functions and local operations for edge detection in images 161
T. Aach, A. Kaup and R. Mester
On texture analysis: Local energy transforms versus quadrature filters 173
C.-s. Liu and H.-c. Wang
A stochastic fixed length segment model for text independent speaker verification 183
R. Ojeda, E.J. Tacconi and C.H. Muravchik
Improved detection in sonar and radar by using signals 193
H.-L. Nguyen and C. Jutten
Blind source separation for convolutive mixtures 209
P. Sircar and S. Mukhopadhyay
Accumulated moment method for estimating parameters of the complex exponential signal models in noise 231

Elsevier Science B.V.

J.S. Lim, C.H. Yon and C.K. Un
An optimum block adaptive algorithm based on the nested iteration technique 245
P. Stoica and M. Viberg
Weighted LS and TLS approaches yield asymptotically equivalent results 255
A. Farina, L. Timmoneri and R. Tosini
Cascading SLB and SLC devices 261
J. Bertrand and P. Bertrand
Comment on "Wide-band ambiguity functions and affine Wigner distributions, by R.G. Shenoy and T.W. Parks", and Authors' reply 267

Announcements and calls for papers 271

Volume 45, No. 3, September 1995

Papers

S.I. Park, K.Y. Lee and I. Song
Performance analysis of FHSS BFSK systems with nonlinear detectors in selective fading impulsive noise environment 275
V. Shtrauss
Functional conversion of signals in the study of relaxation phenomena 293
S. Choi, T.K. Sarkar and J. Choi
Adaptive antenna array for direction-of-arrival estimation utilizing the conjugate gradient method 313
K.-C. Fan, L.-S. Wang and Y.-K. Wang
Page segmentation and identification for intelligent signal processing 329
O. Besson
Improved detection of a random amplitude sinusoid by constrained least-squares technique 347
H. Liu and Z. He
A sliding-exponential window RLS adaptive filtering algorithm: Properties and applications 357
A. Teolis and J.J. Benedetto
Local frames and noise reduction 369
J.-J. Shuy and Y.-T. Ho
The Lagrange multiplier approach to the design of multiplierless two-channel two-dimensional linear-phase FIR filter banks 389
C.-K. Yang, T.-C. Wu, J.-C. Lin and W.-H. Tsai
Color image sharpening by moment-preserving technique 397
